

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## LETTER OF TRANSMITTAL

---

STATE OF NORTH DAKOTA,  
Department of State.

*To the Honorable John Burke, Governor of the State of North Dakota, Bismarck:*

SIR: In conformity with law, I have the honor to submit herewith the Biennial Report of this department for the period beginning July, 1906, and ending June 30, 1908.

Very respectfully,

ALFRED BLAISDELL,  
Secretary of State.

Bismarck, November 1, 1908.

## CORPORATIONS

---

During the biennial period from July 1, 1906 to June 30, 1908, 962 corporations have been organized under the laws of this state, also 158 different papers have been filed and recorded, such as change of name and location of corporations, increase and decrease of capital stock, etc., and certificates of authority have been issued for each of them. At present there are 1,208 active corporations organized for profit, on the record books of this department, besides about 1,000 religious, charitable and benevolent corporations, also about 900 foreign corporations of which, during the above period 138 have filed their articles and received a certificate of authority. In connection with this I would recommend a complete revision of the corporation laws as the present laws are conflicting in a good many ways and not clear in some points. I would recommend especially a lower fee for incorporating as for instance, under the laws of Arizona, the incorporating fee is fifty dollars on a capital stock of \$5,000,000 or less, whereas, in this state the fee would be almost prohibitive. It is my opinion that this state loses a great deal of revenue on this account, as outside parties prefer to incorporate under more liberal laws, thus depriving our state of the revenue which it would receive if the incorporating fee was more liberal. Further more a foreign corporation may transact business in this state by paying a fee of twenty-five dollars, whereas, parties of this state wishing to incorporate under our laws, are compelled to pay at least a fee of fifty-eight dollars.

A law should be passed also compelling every foreign corporation, authorized to do business in this state, to maintain an office herein, as a great number of foreign corporations do not maintain an office or are not known at all in the place they specify in their articles of incorporation and appointment of attorney as their place of business. Thus making it impossible for this department to serve papers on such corporations.

### NAMES OF INCORPORATORS.

I would recommend a law to be passed specifying that the name of every corporation should end with the word "Inc." or should contain one of the following words herein, as substantive or noun: "Association," "Company," "Corporation," "Club," "Society," or "Syndicate," and should be such as to distinguish it from any other formed or incorporated company in this state, or engaged in the

same business, or promoting or carrying on the same objects or purposes, and further such corporate name should not be a misleading one or contain a misleading word repugnant or inconsistent with the objects or purposes stated in the articles of incorporations.

The similarity of names admissible under the present provisions can easily be made to serve the purpose of dishonest operators. Companies which have gained a reputation upon merit may be injured by the operation of some company having the same name, perhaps organized to trade upon the reputations of others. For example, the laws should specify that no parties should use the word "Trust" or "Trust Company," unless they are incorporated as a trust company under the laws governing the same. We have a law specially prohibiting the use of the word "Bank" or "Banking," unless the parties using the same are incorporated under our banking laws and authorized to do banking business, but we have no laws specially prohibiting the use of such words as "Trust Company," "Savings Company," etc., where such companies have not organized under the laws governing the same.

I would recommend the amendment of the law regarding the annual corporation report to be made to this department by the different corporations, compelling them to also state in the report the amount of the paid up capital stock and give the names and addresses of the board of directors, and if possible the names and addresses of the shareholders and the number of shares held by each.

## INDEX

This department is badly in need of a new index system for the same reason as stated, at the time I took charge of the office. The present index system is insufficient and a new revised index of all papers on file is badly needed.

This is a very important matter and the efficiency of the department is entirely dependent on the completeness of the different indexes. It will take at least six months to complete a new index, such as is required.

## NOTARIES

The number of notary commissions in force up to date is 3,209. In connection with these I would respectfully call your attention to the seals used by the different notaries. Some of them contain the name of the notary, but a very great number of them contain simply the words "Notary Public, State of North Dakota," thus making them practically alike.

This department is often called upon from other states, and departments of foreign countries, to certify as to the signature and seal of a certain notary; but on account of so many seals being practically alike this is almost impossible to do, for how is this department

to know that the notary used his own seal and not the seal of some one else.

I would recommend an amendment to the law requiring every notary to have his name engraved upon his seal.

### COMMISSIONER OF DEEDS

As the law now stands, the governor is not allowed to appoint more than one commissioner of deeds for North Dakota in any one city. I recommend that this law be repealed, and a law enacted, allowing the governor to appoint as many commissioners of deeds in any one city as he deems best. For instance cities like New York, Chicago, etc., should certainly be allowed more than one register of deeds, besides the state would derive more revenue, the fee being ten dollars for each appointment.

### SUPREME COURT REPORTS

This office has received from the printers during my term, volumes 14 and 15 of supreme court reports, same have been distributed according to law, those remaining on hand are stored.

| Corporation tax .....                                                                                        | 35,310.00    |
| Filing and recording domestic corporations .....                                                             | 2,193.00     |
| Fee for filing articles of incorporation.....                                                                | 5,149.00     |
| Filing and recording foreign corporations .....                                                              | 2,967.00     |
| Appointment of attorney for service by corporations....                                                      | 760.00       |
| Laws and reports.....                                                                                        | 6,438.55     |
| Fees filing corporation reports from June 30, 1906 to<br>January 2, 1907.....                                | 2,131.00     |
| Fees filing corporation reports from January 2, 1907 to<br>June 30, 1908 .....                               | 3,879.50     |
| Miscellaneous, admissions of service, agents' licenses,<br>extradition papers, copies and certificates ..... | 2,030.51     |
| Total .....                                                                                                  | \$ 66,703.56 |

#### Summary of Fees Received During Past Biennial Periods:

|                                                        |              |
|--------------------------------------------------------|--------------|
| Receipts for biennial period ending June 30, 1898..... | 11,029.79    |
| Receipts for biennial period ending June 30, 1900..... | 17,951.00    |
| Receipts for biennial period ending June 30, 1902..... | 21,062.75    |
| Receipts for biennial period ending June 30, 1904..... | 32,226.75    |
| Receipts for biennial period ending June 30, 1906..... | 54,545.75    |
| Receipts for biennial period ending June 30, 1908..... | \$ 66,703.56 |

From the following summaries it will be readily seen that the Secretary of State's office is not merely a self-sustaining one, but a permanently and constantly increasing source of revenue to the state.

## CONCLUSION

In conformity to law the report covers fully all moneys received from any source for services performed. The expenditures of this office have never been considered as coming under appropriations, and are on record in the auditor's department and will be covered in the state auditor's report.

In closing this report it gives me pleasure to acknowledge the courtesies and advice received from the various state officers in discharging the duties of this office, also the courtesy and consideration which I have received from the various state boards, of which I am a member.

To the clerks and employes of this department, I am under personal obligation for faithful attention to their duties.

## SUMMARY.

| Sources                                                                                 | Amount      |
|-----------------------------------------------------------------------------------------|-------------|
| Notaries Public .....                                                                   | \$ 5,845.00 |

## SESSION LAWS

This office has received from the printers the 1907 session laws. the same have been distributed according to law, those remaining on hand are stored in the supply room.

## HOUSE AND SENATE JOURNALS

Copies of the house and senate journals were received from the printer and the same have been distributed according to law.

Session laws, supreme court reports, house and senate journals, and the blue book, come to the secretary of state for distribution. After distribution all surplus volumes of supreme court reports and the session laws are kept by the secretary of state for sale. This office did not receive the 1907 session laws until September, 1907. We still have a large number on hand, but I am of the opinion that the greater part of them will be disposed of before the next regular edition of the session laws are received.

two years amounted to \$52,823.18 and it became necessary for the Emergency Board to make an emergency appropriation of \$15,000.

*January 1st, 1905—*

The maintenance capitol fund had a balance of \$780.04 and enough unpaid bills on file to much more than offset this. The legislature of 1905 appropriated for the years 1905 and 1906 the sum of \$48,000. The miscellaneous collections during the two years to the credit of the fund amounted to \$5,684.96. The total expenditures during the two years amounted to \$66,555.57. The Emergency Commission refused to make any appropriation and on January 1st, 1907, there was an overdraft in this fund amounting to \$12,090.57, and still more bills on file and unpaid.

*January 1st 1907—*

There was an overdraft in the maintenance capitol fund of \$12,090.57 and more bills on file which were unpaid. The legislature appropriated for the years 1907 and 1908 the sum of \$50,000 and a further sum of \$12,500 to take care of the overdraft in this account on January 1st, 1907. During the year 1907 and ten and a half months of 1908 the miscellaneous collections to the credit of the maintenance fund have amounted to \$5,230.07 and in addition to this the fund has been credited with an emergency appropriation made by the Emergency Board of \$6,000. The payments out of the maintenance capitol fund for 1907 and ten and a half months of the year 1908 have amounted to \$63,213.24. At the present time there are on file and unpaid, bills against the fund amounting to something like \$1,500 and more bills contracted. Before the 1st of January, 1909, the employees of the building will have to be paid two months salary, and which will amount to approximately \$2,500. The state auditor refused to pay any other bills against this fund until the legislative assembly shall have made appropriation to take care of the bills chargeable to such fund.

The fund is not required to take care only of the bills which the name of the fund would lead one to believe payments were made for—"Maintenance Capitol"—but it must pay for the coal used in heating the building and for furnishing light and also to furnish power to run the street car, it is required to pay the bills for the maintenance of the executive mansion, so far as repairs to that building and help for the care of the lawns, etc., is concerned. And further, during 1907 and 1908 the fund has paid the following amounts for the several offices of the building. Postage, express, telegraph service freight.

|                         |             |
|-------------------------|-------------|
| Postage .....           | \$ 9,700.00 |
| Express .....           | 2,300.00    |
| Telegraph service ..... | 300.00      |
| Freight .....           | 400.00      |

Up to the present time of this biennial period the expenditures have amounted to over \$63,000 but of this amount over \$12,000 has been for the four items shown above. Before the close of this biennial period bills will have been contracted, together with those already contracted and unpaid, which will bring the cost of maintenance capitol close to \$70,000. I do not believe that this is unreasonable considering that the state is growing very fast and considering that in the last two years at least three new offices have been added to the building which must be taken care of—Promotion Irrigation Department, Historical Society Department, State Library Department. And in addition the cost of operating the street car line and the necessary help to operate the same, also repairs and help for the power house.

The appropriation for "Maintenance Capitol" for 1909 and 1910 must be at least \$75,000 in order that all necessary bills can be promptly paid, the same of course to include the same expenses as have been for the past two years paid out of this fund. At the present time the offices of the state capitol building are not furnished with the necessary furniture, to prove this I might add that all of the typewriter desks, the office tables, chairs and standing desks which have been purchased for the use of the legislature are now being used in the several offices of the building, and it is necessary for me to take from the offices the furniture loaned and belonging to the legislature. Furniture has not been provided for the offices because the appropriation for maintenance capitol, and out of which fund furniture must be paid for, has not been large enough. I think your board will agree that it would be much better that the furniture purchased for the use of the legislature be allowed to remain in the rooms used by the legislature, rather than to allow it to be distributed through the building during the two years when the session was being held. It is very hard to get the officials to return the desks and tables as they are necessary in carrying on the work of the offices and they have nothing to replace them during the session of legislature, which two months usually is a very busy time with the departments of the capitol.

I have called your attention to some changes that should be made at the executive mansion and I feel that you will find upon investigation that my recommendations are such as would add to the comfort of the occupants and the appearance of the mansion. I have called your attention to the necessity of a water tower to furnish better fire protection to the capitol building. At the present time there is absolutely no protection to the roof of the building, from fire, and the erection of a water tower would give water supply to be used for the lawns and would also furnish protection to the thousands of valuable records which are on file in the capitol and which in a great many cases it would be impossible to replace were they to be damaged or destroyed. A water tower would also tend to reduce

the price of insurance, for which at this time we are paying a high rate. The tanks which now are located in the top of the building to furnish protection against fire to the building and water to the departments, are filthy and should be removed from the building. It is impossible to prevent them being overfilled at times and in such cases the overflow leaks through and ruins the plastering in the halls.

This report is made according to my personal investigation and I sincerely trust the board will take the time to thoroughly investigate and compare my report with the conditions which they find exist. I feel that if the board will investigate they will agree with me that many changes should be made and I also feel that they will find that the appropriation of \$75,000 which I have recommended will not be too large an amount to properly maintain the State Capitol Building. If new furniture must be provided for the offices to take the place of furniture usually borrowed from the legislative rooms the appropriation will have to be even larger than the sum I have recommended.

I thank you for any consideration you may see fit to give this report and my suggestions.

Respectfully submitted,

D. M. SLATTERY

Superintendent State Capitol Building.

#### MEMORANDUM OF NEEDED REPAIRS.

##### *Capitol Roof—*

Leaking badly. Temporary repairs made. Damage done to house and senate chambers, law library and the different rooms on third floor.

##### *Law Library—*

Judges' chambers need awnings over windows. Plate glass windows needed, as ordinary windows will not stand the high winds. Several windows have been blown in and in two instances judges were injured by the flying glass. The plaster is continually falling and unless something is done the books are bound to be damaged—many already have been.

##### *Hallways and Corridors Third Floor—*

Plaster falling down at entrance to house chamber, caused by leaky roof. Plaster continually falling down in the hallways and corridors of third floor.

##### *Old Senate Chamber—*

In dilapidated condition. It could be fixed up for the legislative reference library or house committee rooms. All the plaster in dangerous condition, which is caused by leaky tank in attic.

*Senate Chamber—*

The gallery needs new carpet as the one in use now is unsanitary and not fit to be used for the purpose. The senate chamber is very much in need of painting, new curtains and also a new carpet, as the one on the floor is so badly worn that if it were taken up to be cleaned, it could not be put down again.

*Hallways and Corridors Second Floor—*

Plaster continually falling down—all gone from toilet room. Plaster falling down in house retiring room, cloak and committee rooms. Plaster falling down in senate cloak, retiring and committee rooms.

*Secretary of State's Office—*

New curtains needed. Offices have not been painted since wing has been built. Plaster cracking in places and in danger of falling.

*Governor's Offices—*

Need new window shades. Also badly in need of painting. The walls should be tinted. There should be running water to lavatory, such as other offices have.

*Public Examiner's Office—*

Plaster falling, in need of new carpets, hard wood floors, such as the other offices have, and new window shades.

*Commissioner of Insurance Office—*

Plastering falling; very much in need of papering.

*Attorney General's Office—*

Plastering falling down, badly in need of papering and painting.

*Superintendent of Public Instruction Office—*

Lavatory with running water such as other offices have.

*Hallways First Floor—*

Plastering loose and in danger of falling down—some has already fallen. Plastering is about all down in toilet room.

*Adjutant General's Office—*

Plastering is poor. Needs painting and walls in need of tinting.

*State Engineer's Office—*

Walls need painting; new window shades are also needed.

---

*Commissioner of Agriculture and Labor Office—*

These rooms are the show rooms for visitors to the building, and to make them in keeping with the exhibits displayed, they should be painted and the walls should be tinted.

*Basement Floor—*

Plastering is all down in toilet room; also in different places in the halls and corridors and is continually falling down.

*Miscellaneous—*

The woodwork on building both outside and inside need painting badly, especially the windows. Cornice work, east and west sides mostly all gone and what is left needs painting and repairing. The brick work on top of the west side of the building is constantly crumbling and at intervals going to the ground. Stairway that was destroyed by fire four or five years ago was never replaced and it is very greatly needed.

*Water Supply Tanks—*

There are two water supply tanks in the attic of the building that have caused most of the damage to the building and I would suggest that a tank be placed on the hill back of the building, with a capacity of 50,000 gallons or more. It could be used for irrigating purposes, as well as supplying the building with water: also used for fire protection. The tanks in the attic are below the roof and in case of fire breaking out on the roof, from lightning or any other cause, it would be hard to control. The fire hose in the building should be replaced, as I do not consider the hose here of much account. It is about twenty years old—has never been replaced.

*Roads and Grounds—*

Would suggest that the roads on the capitol grounds be paved, as there are no suitable driveways on the grounds nor leading to them. On the east side of the building the road is composed of brickbats mixed with clay and after every rain the clay is washed away with the brickbats protrude, leaving the road in a bad condition and dangerous to any vehicle going over it. Would also suggest that the state open the road known as New England Avenue from the junction of West Capitol street and South Capitol street over to Fourth street, and that the state lay walks and plant trees, as I understand that the state owns most of the walks along this street; also lay walks and pave Pennsylvania avenue to the boulevard, as the state owns nearly all of this property. Would also suggest that a lawn be placed north of the capitol and trees be planted. The present condition is unsightly, as it has grown to weeds. This could be done cheaply and I hope the board will look into the matter. I have

put a small lawn between the engine room and power house and it has done very well, also a small lawn in front of the building, which has done well. A lawn should be put around the Roosevelt cabin, which is on the grounds.

A new fence for inclosing the grounds is almost a necessity, as the old one is hardly worth repairing. The boards, as well as the posts, are in a decayed condition. I would suggest that the old board fence be replaced by a modern iron fence.

#### *Governor's Mansion—*

A team of horses and a conveyance should be an adjunct of the residence of the governor and should be supplied. The state has already furnished a carriage, but it is of no use without horses. The carriage is not suitable for the purpose for which it was purchased and I would recommend that it be sold and a more suitable one purchased. Would also suggest that a janitor be stationed at the residence to take care of the lawn and horses in the summer months, and to look after the furnace and do such other work as is necessary in the winter months.

Regarding the residence itself. The kitchen is in need of plastering and kalsomining and a new oil cloth for the floor. The parlors and halls need papering and the woodwork should be varnished. Some of the furniture is old and should be replaced. The library is very dark and I would suggest that a larger window (plate glass) be placed on the east side of the residence, so that on dark, cloudy days the rooms would have some light. As it is now, in order to read, the electric lights have to be turned on.

The residence should be painted, both inside and outside. New window shades and lace curtains should be supplied; as well as new rugs in the hallways. There is a cess-pool in the yard and I would strongly recommend that it be done away with and complete sewer connections be made with the city sewer. As it is now, part of the residence is connected with the city sewer and part is not. The cess-pool is unsightly, unsanitary and a menace to the residents of the gubernatorial mansion, as well as to the other people residing near. There is no running water in the basement and I would suggest that stationary tubs be placed in the basement to be used for laundry purposes, also that a lavatory and toilet be placed there as it is needed badly. I also believe that a lump sum should be appropriated for the use of the mansion to purchase such as is needed there. The lawn is overrun with dandelions and something should be done to eradicate them. The barn is badly in need of painting.

#### *Street Car Line and Power House—*

The trolley wire is too large for the poles and should be sold and a smaller wire bought as the car line could be run with a wire about half as large. I believe that this wire could be sold with profit and

a smaller wire bought to replace it and money to spare. The trolley poles are all bending over and I believe that they will have to be replaced within the year. The state should plank the car line both inside of the track and leading to the track.

The dynamo for running the elevator and furnishing lights is too small and is not able to furnish lights to the building and run the elevator at the same time. There is quite a lot of repairing to be done in the engine room. Old pipes to be replaced, parts of the machinery to be replaced, brick work needed on boilers, pipes to be stayed, and in fact the engine rooms and boiler rooms need a complete overhauling. I would strongly recommend that a tunnel be built from the power house to the building and the pipes be placed in same. As it is now the pipes are placed in the ground and covered up with dirt and if they spring a leak, which they have done repeatedly, it becomes necessary to dig them up, whereas if a tunnel were built, the pipes would be free from rust and they would be preserved and not intergrate. D. M. SLATTERY, Superintendent.

#### OTHER STATE BOARDS.

Other boards in which the Secretary of State has additional duties either in the capacity of Chairman or Secretary are as follows: State Board of Auditors, (not the State Auditing Board), State Canvassing Boards and the Emergency Commission. I have endeavored in all of these Boards or Commissions to have reduced to permanent form the proceedings of each, and which in past administrations has not always been done.

The Secretary of State is also a member of the Board of University and School Lands, State Banking Board and State Historical Society, but has not additional duties in any of them.

#### STATE LAW LIBRARY.

The State Library is the State Law Library and while coming under the supervision of the State Department, yet the direction of same has been always regulated under the advice and approval of the Supreme Court.

I have gone on the principle that the State Library, as a Law library, and nothing else, should be particularly satisfactory to the Supreme Court, members of the Legislature, officials generally and members of the bar. The librarian is and should be satisfactory to the court.

The library has grown to such an extent that an assistant is particularly needed, in order that the property be more carefully protected and that the rooms at any time be not left open without a custodian present. The volumes of the library are considerably in demand especially during the legislative session, and during such legislative session it is more necessary that the library should not be left open to the public without a custodian being in charge who

may keep check on every volume used. This has been impossible in times past. I trust additional help will be allowed to obviate this trouble. There are many improvements desired, such as additional book cases, desks, tables, matting for the aisles, the constant tread on the bare floors being most annoying to the court and the users of the library.

The Supreme Court is probably about to be increased in number and this alone requires an additional librarian to aid and assist them in having ready access to desired references.

## COMMISSIONERS OF PUBLIC PRINTING

By virtue of section 37 of article 4 of the political code of the Revised Codes of North Dakota for 1905, a board designated as the Commissioners of Public Printing, is created. This board is composed of the secretary of state, state treasurer and state auditor, who are ex-officio commissioners of public printing during their terms of office respectively.

As provided by law relating to public printing, the commissioners have charge of all the printing and binding required to be done for the several departments of state government.

It is provided that all departments shall file a requisition with this commission for such printing and binding as is required by the different departments, and it remains for the commission to have this class of work properly executed according to law.

The law provides that it shall be the duty of the secretary of state to issue all orders for printing and binding as may be required for the various state offices and departments which have been authorized by the commissioners of public printing according to law. The law also provides that he shall receive all printed work from the contractors and deliver the same to the respective departments from which it is ordered. It is also required that the secretary of state keep a record of all printing and binding as it has been supplied to these departments, and he is also required to keep a record of all the proceedings of the Commissioners of public printing.

Therefore it is imperative and also prescribed by law that all printing and binding required by these state departments shall come within the purview of this board and shall be duly authorized by these commissioners, as the law further provides that no printing shall be paid for out of this fund unless authorized by this commission or the legislative assembly, neither shall these bills or accounts be paid for until first approved by this commission.

With the advent of this present administration this regulation has been made plain to all of the departments and it has been with the exception of only a few instances, rigidly adhered to pleasantly and profitably.

The law pertaining to printing also provides that the commission may employ an expert, who is familiar with all classes of printing, the material used therein, measuring the work done and computing the prices to be paid therefore, for such period of time each year

as may be necessary for the performance of duties devolving upon him, and whose duties it shall be to confer and advise with such commissioners relative to the placing of contracts, to examine all work and supplies for the purpose of ascertaining whether the same conforms to the contract, to examine all accounts for printing for the purpose of determining whether the charges contained in such accounts are correct and report the results of his findings to the commissioners, and perform such other duties as may be required of him by the commissioners.

Such an expert had been in the employ of the commissioners from time to time up to the present administration. Early in this biennial period the state auditing board authorized the secretary of state to engage a clerk who was to be employed under the personal direction of the secretary of state in his department, and who should be a competent printer having all the qualifications and performing the same duties as that of an expert printer prescribed by law, and that he be required to perform such other work as the secretary of state might deem suitable for him to perform while engaged in supervising the execution of public printing and binding. This arrangement has kept a competent printer constantly at the capitol building in a regularly established office, who could at all times advise the commission on matters of this character, as well as advising the various departments within the state government. This arrangement has proved of material benefit to all concerned. It has been the means of helping all the departments to economize in their allotment of this class of supplies.

The printing of the state is divided into five classes.

The printing of bills, resolutions and other documents for the use of and incident to the legislative assembly, constitute the first class. The printing and binding the journals of the senate and house of representatives, constitute the second class. The printing and binding of executive and public documents and the departmental and institutional reports constitute the third class. The printing and binding of the volume of laws with the joint resolutions which shall be included in said volume constitute the fourth class. The printing of all blanks, circulars and other miscellaneous jobs of printing required by and necessary for the use of the various departments, other than such as are printed in pamphlet form therein entering into the volume of executive documents, and all printing not included in the first four classes, constitute the fifth class. These five classes of printing cover every character of printing and binding required and used by the various departments and institutions of the state, such as is paid for from the fund appropriated for public printing by the legislative assembly.

It is the duty of the commissioners of printing to place this classified printing under contract for a period running for two years. The first and second class in one contract, and the third and fourth

and fifth classes in separate contracts. These contracts have been awarded every two years as prescribed by law, with the exception of the fifth class. It is almost impossible to place that class under any contract, because of the fact that this class is so miscellaneous in its character and the amount required by each department so indefinite.

In fixing the appropriation for public printing the Tenth Legislative Assembly amended Section 76 of the Revised Codes of 1905 as follows:

#### PRINTING APPROPRIATION.

AN ACT Prescribing the Duties and Authority of the Commissioner of Public Printing, and Making an Appropriation for Public Printing and Binding.

*Be It Enacted by the Legislative Assembly of the State of North Dakota:*

SECTION 1. AMENDMENT.) Section 76 of the Revised Codes of 1905 is hereby amended and re-enacted to read as follows:

SECTION 76. PRINTING ACCOUNTS KEPT BY SECRETARY OF STATE.) All accounts for printing and binding, required for the legislative assembly, or any officer or department of the state government, shall be certified to according to law and before payment be approved by the commissioners of public printing. It shall be the duty of the secretary of state to keep a record of all proceedings of the commissioners of public printing, and also a record of all public printing, which shall be duly authorized by law, and issue requisitions for all such printing and binding as may be required for the various offices and departments. He shall receive all completed work from the contractors for public printing, and deliver the same to the respective departments for which it is ordered. When vouchers for public printing shall have been approved and verified according to law, it shall be the duty of the state auditor to draw his warrant on the state treasurer for such sum or sums as may be found due. A sufficient sum is appropriated out of the state treasury, not otherwise appropriated, to pay for all public printing and binding heretofore ordered by the state, and hereafter to include legislative printing, said amount not to exceed thirty thousand dollars annually.

SEC. 2. EMERGENCY.) Whereas, it has been the custom heretofore to charge legislative printing up as legislative expense instead of public printing, thus decreasing the apparent amount of cost of public printing and wrongfully increasing the expense account of the legislative assembly, an emergency exists, and this act shall take effect from and after its passage and approval.

Approved March 2, 1907.

Thus it will be seen that if the law is allowed to remain in force during the coming biennial period all legislative printing will be charged against the public printing fund instead of legislative expense, as formerly.

The amount of printing required by the last legislative session aggregated approximately \$30,000, but as the amended law did not take effect till March 2, 1907, the amount of legislative printing for the tenth assembly remained as an item of legislative expense. But with this law in force for the next period and should the printing appropriation be fixed at \$60,000, the Eleventh Assembly of the Legislature will require undoubtedly fully half of that amount, leav-

only about \$30,000 for the printing of all the reports for all the state institutions, and state departments together with all the miscellaneous printing required and allowed by law for state officials and the state departments at the capitol for the next two years.

Considering the rapid development of the state the amount of printing required by all institutions and departments will necessarily increase. The annual and bienial reports that make up the public documents are the only real history of our state government, and the fund for printing such documents that will be of great value to posterity, should be liberal enough to warrant officials improving and increasing in a great measure the statistical data to be contained therein.

More printing will be required during the coming two years, and with the law of 1907, as quoted in the foregoing, remaining in force, the appropriation for public printing to be fixed by the Eleventh Assembly of the legislature should not be less than \$90,000 to cover all costs of printing for the legislature, institutions, state officials and state departments.

Only up to and including the present administration has there been any record of public printing maintained in the office of secretary of state as is required by law, and for that reason it is impossible to show detailed in this report just what amount of printing has been used by the various institutions, departments and officials for this complete biennial period. The amounts given below show the amount of printing, according to the bills that have passed through the hands of the commission since early in January, 1907, up to and including June 30, 1908, but does not show the large amounts of public printing necessarily used during the past six months of the previous administration. The following amounts have been charged against the public printing fund between the dates mentioned, according to requisitions issued.

|                                            |             |
|--------------------------------------------|-------------|
| State auditor .....                        | \$ 2,147.55 |
| Attorney general .....                     | 166.00      |
| Commissioner of agriculture and labor....  | 1,155.85    |
| Commissioner of insurance .....            | 4,320.76    |
| State treasurer .....                      | 928.43      |
| Secretary of state .....                   | 1,745.41    |
| Superintendent of public instruction ..... | 13,848.40   |
| Executive department .....                 | 280.50      |
| State engineer .....                       | 35.50       |
| Public examiner .....                      | 1,355.79    |
| Game warden No. 1 .....                    | 454.60      |
| Game warden No. 2 .....                    | 251.25      |
| Agricultural college (Report) .....        | 467.31      |
| Institution of feeble minded (Report) .... | 110.09      |
| Manual training school (Report) .....      | 28.40       |
| State geologist (Report) .....             | 2,024.88    |

---

|                                                                            |              |
|----------------------------------------------------------------------------|--------------|
| Supreme court report Vol. No. 14 .....                                     | 2,190.97     |
| Public documents, 500 sets three volumes,<br>each for years 1905-1906..... | 1,333.17     |
| Total .....                                                                | \$ 32,844.86 |

The amount of printing shown for the superintendent of public instruction exceeds to a great extent that of any other department, but the law requires the educational department to supply the schools of the state (nearly 4,500) with all blanks and blank books for submitting records and reports to the state department.

The officials and departments that have had their printing charged to their own expense account but who have had it supervised by the commissioners of public printing between January, 1907, and June 30, 1908, are as follows:

|                                                |             |
|------------------------------------------------|-------------|
| Department of university and school lands.. \$ | 1,980.97    |
| Board of health .....                          | 462.80      |
| State historical society .....                 | 799.26      |
| Enforcement commissioner .....                 | 27.25       |
| Live stock sanitary board .....                | 666.14      |
| Board of railroad commissioners .....          | 643.49      |
| Supreme court .....                            | 459.25      |
| Library commission .....                       | 281.50      |
| Total .....                                    | \$ 5,320.66 |

The totals quoted in the foregoing show but a trifle more than half of the \$60,000 appropriation for public printing has been used, but after June 30, 1908, the greater bulk of the printing for this period is yet to be executed, as all of the annual and biennial reports are not printed until after date.

## NOTARIES PUBLIC

Commissioned for the two years ending June 30, 1908.

| Date      | Name and Location                   | Amount  |
